

“I approached Silver Pacific EZ Pay in 2012 and it has been very beneficial to my business needs. I find that price is right and the software provided is sound.

As I’m an agent and run trucks, the custom Dispatch Software allows me to integrate both sides of my business. It’s nice to have the back office AR support so I am able to focus more closely on my customer needs.

This program would benefit a small to medium company that is looking for a dispatch system and back office support.”
